With JASPER You're Part of the Solution!

Your customers rely on dependable performance from their cars, trucks and SUV's. But when a differential or axle assembly fails, they face the stress and inconvenience of finding alternate transportation and arranging repairs.

You can provide your customers with a cost-effective and reliable solution as an installer of JASPER Remanufactured Differentials and Rear Axle Assemblies.

JASPER also offers an additional line of Differential Products for your convenience (call for availability).

- Wheel Bearing Kits
- Axle Shafts
- 7.25 4WD Actuator Assemblies include: bearings, seals, washers, splined side gears, shift fork and collar, and a new electric shift motor.
- 7.25 AWD Actuator Assemblies include: bearings, seals, washers and splined hub.

JASPER Remanufactured Rear Axle Assemblies & Differentials are...

- Assembled by JASPER's skilled technicians with a standard set of new parts, including: bearings, gaskets, seals, thrust washers and O-rings.
- Inspected for precise tolerances for reduced noise and reliable operation.
- Backed by JASPER's knowledgeable sales staff and inside support team, available to advise you with technical data, product pricing and availability.
- Covered by JASPER's 3 Year/100,000 Mile Nationwide Parts & Labor Warranty.

Your customers will be back on the road faster with JASPER's extensive inventory of remanufactured differentials and rear axle assemblies available through our huge distribution network across the U.S. and our fast turnaround on custom remanufactured components.

- Differential and Transmission supplier to NASCAR® Sprint Cup and xfinity Series teams.

The JASPER Process Assures the Highest Quality.

Every JASPER Remanufactured Differential & Rear Axle Assembly is subjected to strict, high-quality processes. Your customers will know they made the right choice!

JASPER's complete line includes: GM, Ford, Dodge, Dana/Spicer, even Isuzu, Mercedes and Toyota truck applications up to 2 tons!

- Bearings are preloaded to OEM specifications for longer bearing life, smooth operation and proper break in.
- Remanufactured differentials are inspected for correct backlash clearance to assure proper gear lubrication for reduced noise and to avoid overheating, especially in severe-duty applications.
- Tooth contact pattern is inspected and adjusted to utilize the full structure of the gear for minimum gear noise and reduced fatigue.
- During the differential remanufacturing process, JASPER has the ability to remanufacture axle ends for applications up to 1 1/2 tons.
- Custom remanufacturing is also available.

Remanufactured in the U.S.A.

Specifications subject to change without notice.
